Power of our People

Starting this month, GE’s Energy Consulting business will showcase members of our team through our new **Power of our People** campaign. We’ll be sharing profiles of our experts and their areas of expertise through digital media platforms including LinkedIn and Twitter. If you and your organization need reliable, economic and sustainable power systems solutions across the entire electric power system – we’re here to assist, collaborate and partner to reach your desired outcome. For more information and to learn more about our customers and partners, the solutions we can provide, our range of services, and the **Power of our People** visit [geenergyconsulting.com](http://geenergyconsulting.com).

**News & Insights**
Vietnam Electricity awards USTDA funded study to GE
The U.S. Trade and Development Agency (USTDA) announced that GE's Energy Consulting business has been awarded a USTDA funded battery storage feasibility study by Vietnam Electricity (EVN). The study will provide economic and technical analysis to determine the viability and options for large scale battery storage deployment on the EVN grid with the target date of completion in early 2020. For more information visit geenergyconsulting.com/press-releases.

ESIG 2019 Excellence Awards
Jason McDowell and Sebastian Achilles, members of GE's Energy Consulting team, earned Excellence Awards for their work on energy systems operations and planning by the Energy Systems Integration Group (ESIG). For more details visit geenergyconsulting.com.

A Blueprint for Hybrid Grid-Scale Renewable Energy IL&FS Energy Development Company and GE's groundbreaking project in India can enable the country to meet its ambitious renewable energy goal, while connecting more people to more reliable, affordable, efficient and clean energy. For a look inside this project, visit geenergyconsulting.com.

GE Software: Planning the Grid of the Future Today
The electrical grid is perhaps the most complex machine ever invented. Without significant planning, making even the slightest changes to how it operates could have catastrophic consequences. Explore this infographic at geenergyconsulting.com to see how GE and its Energy Consulting business are leveraging the power of software, big data and analytics to shape and plan for the grid of the future.
There's a paradigm shift coming. And it isn't about renewables
Check out this new article from our very own Debbie Lew, at the Energy Systems Integration Systems (ESIG) blog www.esig.energy.
