Monthly News

MAY 2021

The Spring season is here in upstate New York and thanks in large part to the vaccine rollout, COVID-19 cases continue to decline across the United States. However, COVID-19 continues to surge and impact our way of life in many parts of the world. We continue to keep our colleagues, customers and our partners who are combating the latest surges in our thoughts and prayers. Our teammates throughout India, Europe and South America remind us that this is the time for all of us to remain focused and resilient as we combat the global pandemic.

As we progress through 2021, please know that our team is here to support you and your organization. We continue to grow our team of experts, and we have several opportunities for our customers and colleagues across the industry to connect with our team and colleagues at GE. From webinars and online training sessions, to our annual GE MAPS and GE MARS Users Group meeting in August, I encourage you to explore these opportunities to connect with our team on a wide range of industry topics. As GE's electric power systems experts, Energy Consulting solves the tough techno-economic problems to enable technology integration while shaping the energy transition. Our team is ready to serve, and we look forward to working with you.

We wish you all the best and thank you again for partnering with our team.

Sincerely,

Beth LaRose
General Manager, GE Energy Consulting

News & Insights

Upcoming GE Webinars

GE Gas Power LOTO Webinar set for May 25, multiple sessions. You already know—it's one of the first steps where it all begins. If you work at a #powerplant, the lock out tag out (LOTO) process is critical when it comes to planning, coordination and safety. So, can we help make it better? [Register](#) for our webinar to find out.

That's a wrap... GE PSLF 2021 UGM

The annual **GE PSLF Users Group Meeting** hosted by GE Energy Consulting's Software team was held between **May 4 -5 and May 11**. This year's meeting was held exclusively online. Special thanks to Jason MacDowell, Senior Technical Director, GE Energy Consulting, for providing this year's keynote address focused on the changing energy landscape and importance of integrated modeling with users. We would also like to thank all our customers and users for their engagement in the annual UGM. In case you missed any of this year's meeting and would like access to any of the recorded sessions, please [contact us](#).
