GE Global Grid Planning: Connecting People to Power Around the World

There are more than 1 billion people worldwide without access to reliable, affordable and efficient electricity. GE's Energy Consulting business is working to close that gap with grid operators, governments, utilities and other stakeholders in countries around the globe. Check out just a few examples at geenergyconsulting.com where we're working to help bring more power to more people.

GE's Microgrid Solutions

Whether it's electrifying parts of the world that have never had electricity before, providing reliable power for hospitals and other critical facilities when the grid is down, enabling greater use of renewable generation like wind and solar, or providing local communities with greater flexibility in choosing their electricity source and how they use that power, GE's microgrid solutions are playing an important role in shaping the utility of the future. For more information, visit geenergyconsulting.com.

Joe Plewinski, Jr.
Principal Engineer, Grid Code
Compliance & Testing

The Power of our People

GE's Energy Consulting business is harnessing the Power of our People to provide customers and partners with vital electric power industry solutions. Meet [Joe Plewinski, Jr.](#) who focuses on grid-code compliance testing, frequency and voltage controls analysis, power system steady-state/ faulted system analysis, and dynamic performance throughout the world. For more details and to connect with Joe, visit geenergyconsulting.com.

PART 3—THE FUTURE OF ENERGY:

Inspiring people and innovative technologies

In this three-part series, GE Power explores the future of energy. With host Mikey Kay and a camera crew in tow, we set off to meet some of the most inspiring people and innovative technologies in the energy industry today. Check out these empowering stories @ ge.com/power/journeys.

Education & Training

GE Energy Consulting is proud to offer a variety of power systems, engineering and software courses for our customers and users. Please contact us today to **CUSTOMIZE** your own program of courses for you and your team. For a full line-up of course offerings and for more information, visit geenergyconsulting.com/education.

GE Energy Consulting

For nearly a century, a core group of leading GE technical and business experts has focused its energies on solving the electric power industry's most pressing challenges -

driving the evolution of electric power systems with greater affordability, reliability, and efficiency. Today, GE's Energy Consulting team continues this tradition by providing innovative solutions across the entire spectrum of power generation, delivery, and utilization. With our cross-company resources, GE's Energy Consulting business can serve a diverse global client base with a strong local presence.
